

Management uses non-GAAP financial measures, as further outlined in the following slides, because it considers them to be important supplemental measures of the Company's performance. Management also believes that these non-GAAP financial measures provide additional insight for analysts and investors in evaluating the Company's financial and operating performance. These non-GAAP financial measures should not be considered alternatives to, or more meaningful indicators of, the Company's earnings per common share, or other financial measures as prepared in accordance with GAAP. The Company's methods of determining these non-GAAP financial measures may differ from the methods used by other companies for these or similar non-GAAP financial measures. Accordingly, these non-GAAP financial measures may not be comparable to measures used by other companies.

EBITDAR

We define EBITDAR as earnings before interest, taxes, depreciation, amortization, share-based payments, rent (inclusive of interest on operating leases subsequent to the adoption of Accounting Standards Update (ASU) 2016-02, *Leases (Topic 842)*), and certain items as defined by the Company's credit facility.

Lease-Adjusted Debt

As of fiscal 2019, subsequent to the adoption of ASU 2016-02, *Leases (Topic 842)*, we define Lease-Adjusted Debt as short-term debt, current maturities of long-term debt, long-term debt excluding current maturities, and operating lease liabilities reflected on our balance sheet.

Prior to the adoption of ASU 2016-02, *Leases (Topic 842)*, we defined Lease-Adjusted Debt as short-term debt, current maturities of long-term debt, long-term debt excluding current maturities, and six times the last four quarters' rent.

Lowe's believes the ratio of Lease-Adjusted Debt to EBITDAR is a useful supplemental measure, as it provides an indication of the results generated by the Company in relation to its level of indebtedness.

ROIC

We define ROIC as rolling 12 months' Lease Adjusted Net Operating Profit after Tax (Lease Adjusted NOPAT) divided by the average of current year and prior year Total Equity and Total Debt including Operating Lease Liabilities.

Lowe's believes ROIC is a useful measure of how effectively the Company uses capital to generate profits.

Lease Adjusted NOPAT

We define Lease Adjusted NOPAT as Net Operating Profit, excluding interest associated with operating leases, after tax.

Free Cash Flow

We define Free Cash Flow as net cash provided by operating activities less capital expenditures.

Lowe's believes Free Cash Flow is a useful measure to describe the Company's financial performance and measures its ability to generate excess cash from its business operations.
